“Great balance between speakers, breakouts and networking. Wouldn't change a thing!”

— Bridget Guerrero, ViaSat

This year's themes

Accelerate brings together CEOs, CHROs, and transformation executives who are executing faster, aligning deeper, and winning with AI agents built for the way enterprises actually work.

Speakers will share how they are:

- You don't just set the vision, you set the pace — How CEO-deployed AI agents raise execution speed and certainty at every level of the org
- Strategy is your promise; execution is your proof — How AI agents deliver the execution certainty, speed, and accountability that turn strategy into real results
- Without knowing your goals, any AI is just a sophisticated search engine — Why context-grounded agents outperform generic AI when built on your strategy, team, and operating reality
- The AI-powered operating rhythm — How agents automate MBR/QBR cadence, scorecards, and pre-reads so leaders spend time on decisions, not prep
- AI agents: your force multiplier for managers — How Chief of Staff and Leadership Coach agents turn average operators into great ones executing company strategy
- You haven't adapted until everyone has — How AI agents align company, team, and individual OKRs as fast as strategic priorities change

Boeing

Erik Huddleston

Chief Executive
Officer, Aprimo

Erik Ana Cervantes

Senior Manager -
Strategy Execution

Reasons to Attend

- 1** The only venue where leaders driving AI-powered strategy execution come together, benchmark your practices, pressure-test your thinking, and raise your game with peers who are executing faster than the market.
- 2** The world is changing faster than most organizations can execute. Learn what the highest-performing teams are doing differently in 2027 and leave with the playbook to do it.
- 3** See how peer organizations are deploying AI agents to align teams, automate cadence, and close the gap between strategy and results, at a pace that wasn't possible even last year!
- 4** Define and improve the ROI on your strategy execution practices and OKR program by capturing compelling proof points and applying methods of peer companies.
- 5** Know exactly where you stand. Benchmark your execution practices, alignment speed, and AI adoption against organizations running on outcomes, and close the gaps that matter most.
